I receive many letters from the Colonels and agents ingaged in purchasing, requesting me to inform them what kind and quality of guns are suitable. To answer, these inquiries would take up much time, and I give these inquiries would take up much thue, and I give herein the kinds of game fit for ass:

For reboring and refitting it is necessary that I have a barrel not less than three fourths of an inch in diameter, at the smallest part of the barrel; and it make and difference whether any part of the gam is good except the harrel; as they are all restocked, and now bands, breech-plates, guards triggers and trigger plates are used. I would prefer to have good locks, but this is not indispensable. Any kind of a doubte-barrel shat gam, mises the barrel is loc much worn, can be made an efficient awapen. Single barrel gams, unless they are of the class known as "duck gams," are useless for army purposes. urposes.
